# Luxury Coating Services

We offer nano coatings on your parts as service from PUNE, MANESAR and CHENNAI

We add colors to your products. Stunning & Vibrant Metallics, Opaques & High Gloss Piano Shades along with our super speciality pad printing , We convert an ordinary looking product into a product of art.

Our colors give vibrant looks of charcoal, magnesium, graphite, magnetic pink, stunning yellow, red, orange, blue, anodized color aluminum, silvers, golds, piano black ,2 tone colors and many more options. The clients can choose their own colors too.

Inviting manufacturers of plastic parts, electrical fittings, LED'S Luminaries home appliances etc to get their parts coated at our 3 state of the art plants in Gurgaon, Pune and Chennai.

We also invite Architects, Interior Designers, Project Managers, Builders and Consultants to explore the ideas of harmonizing wall colors with beautiful switches, switch covers, modules and luminaries customized for you to suit your style and fancy.

We also undertake projects for customization and deliver high quality in a very short time with the automatic German color coating lines.

We are working very closely with automotive interior industry, hence high quality is ensured in controlling the production process.

## Advantages of working with Spinks :

- All the colors are imported from manufacturers in Italy, Germany and Japan.
- All the colors are non-toxic, complying with EN-71 Para-3 safety on toys.
- Luxury finishes like 2 tone chameleon effect, soft haptic effects, pastel, metallic, anodized aluminum finishes, and colored metallic are all available ex stock.
- All colors are extremely thin yet hard films, resistant to chemicals used in wall painting industry like Nitro cellulose thinners.
- "NO PAINT LOOK" is the highlight of our technology.
- Most finishes are launched First time in India, which are generally seen in designer products in Europe or Japan.

Besides job works on your plastics parts we also undertake injection molding jobs to save the expensive transportation. Most of our machines are all electric Japanese German machines .

- Excellent Adhesion on glass and plastics
- Hard Surface
- Temperature Resistant upto 120°C
- Good Light Stability
- Free of Cadmium, Lead, Chromium

*Printing on Switches, Toggles, LED/CFL base, MCBs & other electrical components using Tampoprint AG, Tampon printing technology*

- » Tampoprints are the fastest pad printing machines in the world in this business with speeds up to 8000 pcs/hr.
- » The machines can be used standalone or with optional attachments like conveyor, multi station indexer, shuttle etc. for high productivity.
- » The machines are available for 1,2,3,4 color printing on the Plastic base.
- » SIC 60 can easily print areas up to 55mm on flat surface without any changeovers for up to 8 hours.
