

# Passion for printing inks

and  
innovative  
solutions for  
label decoration

**R**esponsible • **U**nique • **C**reative • **O**riginal

Special RUACO ink systems ensure enhanced performance, stability and colour brilliance in

UVscreenprinting • UVflexoprinting • UVvarnishes

Especially for standard systems and low-migration systems

All system and product benefits:

[www.spinksworld.com](http://www.spinksworld.com)

## 905UV-LM

### UV screen printing inks low-migration, silicone-free

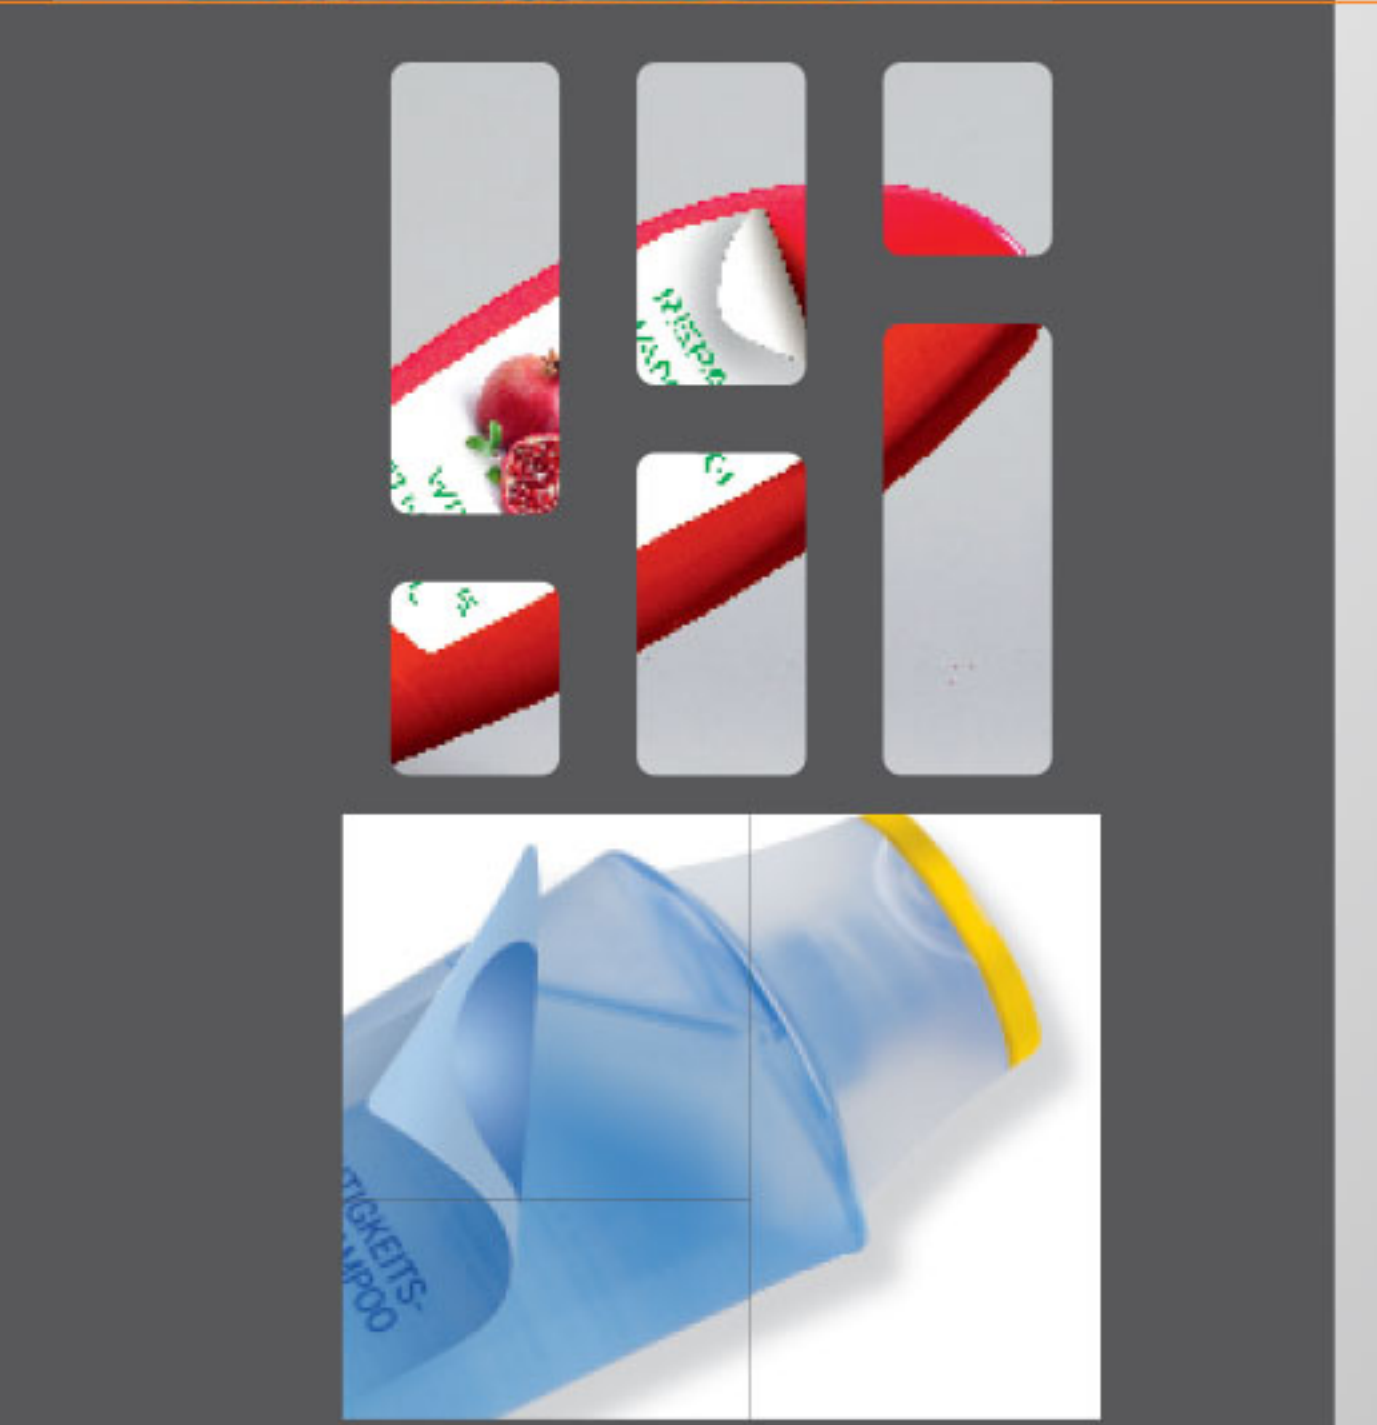

- Low-migration (<10 ppb), comply with the "Nestlé Guidance Note on Packaging Inks" - version 02-2014
- Low viscosity, for universal use on a wide range of substrates
- Very good flow characteristics
- The inks series is silicone-free and suited especially for combination printing with UV flexo printing inks

## 905UV1462LM

### Opaque white low-migration, silicone-free

- Low migration (<10 ppb), comply with the "Nestlé Guidance Note on Packaging Inks" - version 02-2014
- Low viscosity, silicone-free, barium-free, highly opaque, suitable for stamping
- Very well suited for overprinting with UV flexo, offset and letterpress inks
- Pre-treated top-coated PE, top-coated PP, PE, PP, top-coated polyester, PVC and other types of plastic, paper and cardboard

## 965UV/MA

### UV screen printing inks low-migration

- Low viscosity, for universal use on a wide range of substrates
- High opacity and colour brilliance through optimized pigment composition
- Compatible with UV inks for other printing processes
- For all standard rotary screen printing machines and screen meshes

## 965UV1425MA

### Opaque white low-migration

- Low-migration, low viscosity, silicone-free, highly opaque suitable for stamping
- Very good flow characteristics
- Very well suited for overprinting with UV flexo, offset and letterpress inks
- Pre-treated top-coated PE, top-coated PP, PE, PP, top-coated polyester, PVC and other types of plastic, paper and cardboard

## UVFX-LM

### UV flexo printing inks low-migration

- In accordance with positive list 1A of the EuPIA Suitability List of Photoinitiators as well as the specifications of the Swiss EDI Ordinance on Consumer Goods (SR 817.023.21) for inks applied to the non-food contact surface of food packaging
- Free from ITX, benzophenone and 4-methylbenzophenone (4-MBP)
- High opacity and colour brilliance through optimized pigment composition
- For use on all standard UV flexo printing machines

## UVFX-1042LM & UVFX-1043LM

### Opaque white low-migration

- In accordance with positive list 1A of the EuPIA Suitability List of Photoinitiators as well as the specifications of the Swiss EDI Ordinance on Consumer Goods (SR 817.023.21) for inks applied to the non-food contact surface of food packaging
- Silicone-free
- Corona pre-treated PE und PP, top-coated PP und PE, pre-treated PET, PVC (UVFX-1042LM)
- Especially for sleeves (UVFX-1043LM)

900UV1452

Opaque white for combination printing

- Opaque white for combination printing –UV screen / flexo printing
- Overembossing and overprinting of stamping foil possible

995UV1108AR

Opaque white standard ink system

- Low viscosity for speeds > 70 m/min
- Suitable for hot stamping & Pre-treated PE, PP, PET

983UV

UV screen printing inks

- Very reactive with High gloss finish
- Thixotropic formulation, especially suitable for flat screen printing

983UV1266NV

Opaque white standard ink system

- Opaque white for combination printing –UV screen / offset printing
- After 12 hours for Pre-treated PE, PP, polyester

985UV  
&  
985UV/NV

UV screen printing inks

- Universal use, both for flat screen printing and rotary screen printing (low-viscosity formulation – 985UV/NV)
- Very reactive with very good opacity and good flow characteristics
- Can be used on a wide range of substrates
- Very good curing and adhesion even at high machine speeds

985UV1125

Opaque white standard ink system

- Opaque white for flat screen printing
- Very good adhesion on a wide range of substrates such as pre-treated PE, PP, PVC

985UV1153NV

Opaque white standard ink system

- Opaque white for combination printing – UV screen / flexo printing
- Pre-treated PE, PP, PVC, PET

UVFX

UV flexo printing inks

- Free from ITX, silicone and 4-methylbenzophenone (4-MBP)
- High opacity and colour brilliance through optimized pigment composition
- Optimal results in combination with other printing methods
- For use on all standard UV flexo printing machines

UVFX-1044

Opaque white standard ink system

- Standard white for UV flexo printing
- Pre-treated PE, PP, OPP, PET, PVC, BOPP

UVFX-1045

Opaque white standard ink system

- Especially for sleeves
- Good tape resistance on OPP, PET and OPS & Excellent scratch resistance

# Lasers For FMCG & Packaging Industry

## Application Industry

- Food packaging industry
- Medicine packaging industry
- Beverage packaging industry
- Cosmetic packaging industry
- Tobacco packaging industry
- Flexible packaging industry
- Co2 Lasers for marking PET Labels / paper labels.
- Fiber lasers of high power for marking at high conveyor speeds of upto 80 mts/min.
- Marking of Barcodes.
- 2D and QR codes at high speeds.
- Can be integrated into existing customer lines. .
- Complete integration solutions.
